## CAREER OBJECTIVE

Developer with 3+ years of experience in designing, developing, testing, and debugging while staying focused on enhancing efficiency, stability, and scalability of system resources under strict deadlines. Searching for my next developer role to grow and enhance my technical skills and knowledge.

## KEY SKILLS

<b>Programming</b>	Java EE, C/C++/C#, Python, PHP, JavaScript, jQuery, HTML5/CSS, Bootstrap, Node.js, React JS, Tailwind CSS
<b>Databases</b>	Oracle SQL, MySQL, MongoDB
<b>Others</b>	Microsoft Office, Maven, Spring MVC, NextJS, AWS, Windows Server 2012R2, Apache, Tomcat, Git, SVN

## WORK EXPERIENCE

Hankook Tire America Corporation

Nashville, TN

### Web Specialist / Web Developer

2022-07 to PRESENT

- Designed and developed a responsive web application utilizing mainly JavaScript and jQuery for front-end, Java and Java MVC Framework for back-end, and OracleDB to manage the plant Time In/Out records.
- Developed a process on a web system for Container Tracking to improve visibility of the container's status and reduce shipping expenses.
- Developed 5+ management pages not only for admin employees to manage the information or files on the web system but also for web systems to avoid hard coding.
- Improved Web Security by implementing SSO (Single Sign-on), setting up password policy and account deactivation policy, checking IP address for admin accounts, and managing blacklist on AWS WAF.
- Planned, wrote and debugged web application with complete accuracy.
- Scheduled a meeting with other teams to discuss the improvements and announce the updates on web systems.

Hankook Tire America Corporation

Clarksville, TN

### Production System Specialist / Web Developer

2019-10 to 2022-07

- Maintained Oracle DB for MES to resolve the issue and improve plant production process by understanding procedures written in PL/SQL.
- Maintained the source code on 3 web systems by using Git and SVN.
- Worked on the development and support of the Maven Spring MVC web application.
- Migrated on premise server to Bastion Server with Amazon Web Services (AWS).
- Created user-friendly dashboard and reports on web systems for customers to provide summary of their order status, and information of the products.
- Developed a web application written in C# interfaced with Oracle DB to monitor production status efficiently.
- Developed a responsive website in Java EE, JQuery, JavaScript, HTML and CSS, and created an interface with SAP ERP.
- Used AJAX JSON, and HTTP Methods to transfer data from the front-end(client) written in JavaScript, HTML, and CSS to the back-end(server) written in Java for RESTful API.
- Designed and developed a process on a web system for sending/receiving quotation and purchase order documents with vendors, and reduced the lead time for the process by 20%.
- Analyzed data from Oracle DB and SAP ERP with SQL for the web systems to make the operation automatic and efficient, and increased the usage on the web systems by 15%.

## PERSONAL PROJECTS

---

### E-Commerce Website

2022-12 to ONGOING

- ♦ Developed E-Commerce Website to allow users to buy and sell goods and services, and to allow administrators to manage products and see the sales analysis.
- ♦ Utilized React JS with NextJS Framework for front-end NodeJS for back-end.

### Team Lunch Survey Application

2021-01 to 2021-02

- ♦ Developed a web application to allow users to take surveys to decide team lunch date and restaurants
- ♦ Utilized C# with .Net Framework and SMTP server to send/receive the survey result via email.
- ♦ Connected to Oracle DB to load and save the user's login information.
